... After 6 years of coma, German Schumacher wakes up and meets his wife.

His wife who spent most of her money on her husband's treatment before bankruptcy. Despite the big money Schumacher himself received from his income in Formula 1 as he dominated the race for years and despite all the huge sponsorship contracts he had, all the money was spent.

He was losing hope for recovery until one day he woke up and the first person he knew was his wife. This is the woman who has been there for him and hasn't left for all these 6 years..

Loyalty is a trait I adore... Don't be afraid to communicate with a strong woman, there will be a day when she will be your only army!

I wish you immense happiness and loved ones nearby!

Chris Devlin

He was only in a coma for 6 months and then they've spent over £20 million of Schumacher's money he made from racing to healthcare and continue to spend around £50k a week on a team of doctors and nurses to take care of him at home.
